BACKEND

Java • Spring Boot • Quarkus • Node.js • Python • REST APIs • Shell Script

FRONTEND

JavaScript • React • HTML5 • CSS3 • Bootstrap • TailwindCSS

DATABASES

PostgreSQL • MongoDB • Oracle • MySQL

DEVOPS & TOOLS

Docker • Kubernetes • Git • GitHub • GitLab • Jenkins • Maven • Linux • CI/CD • RabbitMQ • Postman • Swagger/OpenAPI • IntelliJ IDEA • VS Code

CLOUD

AWS • AWS EKS • Docker Registry

🔧 ENGINEERING PRACTICES

Scrum • GitFlow • Merge Requests • Code Reviews • Clean Code • SOLID • Hexagonal Architecture • Unit Testing • Observability • API Documentation

👤 TECHNICAL STRENGTHS

ARCHITECTURE

Microservices • Hexagonal Architecture • REST APIs • Systems Integration • Distributed Environments

QUALITY

Clean Code • SOLID • Code Reviews • Unit Testing • Swagger/OpenAPI • Observability

DELIVERY

CI/CD • GitFlow • Merge Requests • Docker • Kubernetes • Development, QA and Production Environments

🌐 LANGUAGES

English — Intermediate: reading and writing

Spanish — Intermediate: reading and writing

🎓 EDUCATION

UNIVALI — Florianópolis, Brazil

Bachelor's Degree in Systems Analysis and Development
2025 – 2027

Anhanguera University — Brasília, Brazil

Associate Degree in Systems Analysis and Development
2023 – 2025

👤 PROFESSIONAL SUMMARY

Java Backend Developer with approximately 2 years of experience building enterprise, distributed and microservices-oriented applications using Java, Spring Boot and Quarkus.

Experienced in designing and developing REST APIs, integrating relational and NoSQL databases, messaging systems, CI/CD pipelines, Docker, Kubernetes and AWS EKS environments.

Hands-on experience in enterprise projects involving legacy system modernization, Hexagonal Architecture, GitFlow, code reviews through MR/PR, Swagger/OpenAPI documentation and software engineering best practices.

🏢 PROFESSIONAL EXPERIENCE

TRIFORCE IT — São Paulo, Brazil

2022 – 2025

Java Backend Developer Jr. | Contractor

- Developed RESTful APIs, microservices and integrations with legacy systems and external solutions.
- Participated in architecture definition, technology selection, database modeling and implementation.
- Used Java, Spring Boot and Quarkus to build scalable and high-performance applications.
- Implemented CI/CD pipelines, GitFlow versioning and code reviews through MR/PR workflows.
- Worked with Docker, Kubernetes and AWS EKS environments across Development, QA and Production.
- Created API documentation using Swagger/OpenAPI and supported observability and monitoring practices.

📁 PROFESSIONAL PROJECTS

COOPARK — TRIFORCE IT

Enterprise Project

Developed a microservice for parking space management, including users, parking spaces, partners, data persistence and image storage.

Implemented REST endpoints, CRUD operations, caching strategies, MongoDB persistence, GitFlow workflow and code reviews through Merge Requests.

Java Spring Boot MongoDB REST API Docker Git Postman

WEG MOTORS — TRIFORCE IT

Enterprise Project

Participated in the migration of a legacy VB6 system to a modern microservices architecture based on Java and Quarkus following Hexagonal Architecture principles.

Worked with Kubernetes orchestration on AWS, CI/CD pipelines, relational and NoSQL database integration, as well as observability and monitoring practices.

Java Quarkus Kubernetes AWS EKS Oracle RabbitMQ CI/CD
